

NUTRACEUTICALS

Biote Nutraceuticals have been carefully formulated to support bioidentical hormone replacement therapy (BHRT), promote healthy aging, and enhance overall wellness. Backed by more than 80 years of science and medical data, these clinical-grade products have been selected for superior bioavailability and can help ensure a complete and personalized approach to meet your health goals.

CURCUMIN-SF

Antioxidant & Hormone Support

Reduces Some Types of Inflammation[†]

Relieves Occasional Joint & Muscle Soreness[†]

Helps Maintain Hormone Balance[†]

CURCUMIN-SF provides powerful antioxidant support that may help reduce inflammation in your muscles and joints caused by stress, overwork, and exercise. Curcumin is a plant-based flavonoid responsible for turmeric's deep yellow color. However, unlike the popular spice, CURCUMIN-SF offers an ultra-concentrated form of curcumin in a proprietary blend to increase absorption by 29x the normal rate.

Greater antioxidant absorption means better support for your joints, liver, gut, and cardiovascular health. Curcumin may also enhance the activity of the COMT enzyme, which helps metabolize estrogen—promoting healthy hormone levels in men and women.
