

NUTRACEUTICALS

Biote Nutraceuticals have been carefully formulated to support bioidentical hormone replacement therapy (BHRT), support healthy aging, and support overall wellness. Combining 3 naturally-derived, optimally-balanced, and science-based ingredients supports improved bioavailability and can help ensure a complete and personalized approach to meet your health goals.

IODINE+

Supports a Healthy Thyroid with Iodine, Zinc, & Selenium

Supports Healthy
Thyroid Function[†]

Supports Healthy
Hormone Balance[†]

Supports Healthy
Detoxification[†]

IODINE+ provides three essential trace minerals (iodine, zinc, and selenium) the body needs to support healthy thyroid function. The thyroid depends on iodine to produce vital hormones that regulate your energy levels, metabolism, and overall health.

IODINE+ does more than deliver a daily serving of iodine. This product was specially formulated to support optimal iodine absorption by balancing iodine with zinc, and selenium. This combination helps support the healthy production of two critical hormones that every cell in the body uses—thyroxine (T4) and triiodothyronine (T3). Maintaining healthy iodine levels may also support healthy detoxification and protect against thyroid-damaging heavy metals and toxins.
